6+ years shipping production software

5+ years leading frontend and mobile teams

9k+ contributions on GitHub

10+ products launched, from idea to release

3 platforms in production: iOS, Android and web

Profile

I design, build and scale web and mobile products end to end, from architecture to the App Store, with payments, multi-language and AI built in. Marketplaces used daily across Europe and South America run on my work, and I ship my own AI products too.

Experience

sheerME

Dec 2021 – now

Frontend Team Lead & Senior Developer — sheerme.com

I **lead frontend engineering** for a beauty and wellness marketplace used every day across Portugal and Brazil, owning the customer and business apps on iOS, Android and web end to end, from architecture to store release.

- **#1 contributor of all time** on both mobile apps (2,700+ commits), upgraded through to Expo SDK 57 and React 19 without slowing releases.
- **Three production frontends from scratch**: the business app (2022), the PRO back office (2023) and the marketplace website (2025).
- **Payments everywhere**: cards, Apple Pay, Google Pay, Pix, Stripe Connect payouts and Tap to Pay.
- **Multi-language, multi-brand platform**: every app ships in several languages and as white-label brands from a single codebase.
- **Own the frontend architecture and engineering standards**; code review, mentoring and pairing that level up the whole team.

What I build there: Customer app, PRO & Salon app, PRO web, Marketplace website, WhatsApp booking assistant.

React Native, Expo, React, Next.js, TypeScript, Node.js, Stripe

Fisgar BR

Jul 2021 – Feb 2023

Frontend Developer — fisgar.com.br

Built and maintained web apps for a Brazilian product company, working remotely in a Scrum team alongside my other roles.

React, TypeScript, Redux, Scrum

Mochi Noir & Met-Care

May – Aug 2021

Project Manager — met-care.com

Promoted to run delivery across two client products: planned and split the work, led the team rituals and owned code review.

Mochi Noir

Sep 2020 – May 2021

Mobile Lead & Frontend Developer

Built e-commerce platforms and digital stores. **Led mobile development** in React Native with a team of 4+ developers, and shipped web storefronts and landing pages in React.

React Native, React, TypeScript, Redux, Jest

Skills

Languages
TypeScript, Java, Python, JavaScript (ES6+), SQL, HTML5, CSS3 / Sass

Frontend
React, Next.js, Angular, Vue.js, Redux & Redux Saga, TanStack Query, Zustand

UI & styling
Tailwind CSS, Material UI, Framer Motion, styled-components, Three.js / React Three Fiber, GSAP, Radix UI

Mobile
React Native, Expo & EAS, Flutter, App Store & Play Store releases, Expo Router, React Navigation, Reanimated

Backend & APIs
Spring Boot, Node.js, FastAPI, Spring Security & JPA, Express, REST & RESTful APIs, Prisma

Databases & storage
PostgreSQL, MongoDB / NoSQL, Redis, MySQL, Supabase, Firebase, SQLite

AI
OpenAI, Anthropic Claude, Embeddings & RAG, AI agents, Vercel AI SDK, Spring AI, Whisper

Payments
Stripe, Stripe Connect, Apple Pay, Google Pay, Stripe Terminal (Tap to Pay), Pix, RevenueCat

Integrations
WhatsApp Cloud API, Twilio, Firebase Cloud Messaging, Google Maps, Mapbox, Resend, Web Push

Quality & monitoring
Jest, Cypress, Playwright, Unit, integration & e2e testing, Selenium, Sentry, Google Analytics

DevOps & cloud
Docker, AWS (EC2, S3), GitHub Actions, Git, Linux, Vercel, Turborepo

Petabyte Feb – Sep 2020

Frontend Lead & UI Designer

Led the frontend of a mid-size project: planned it, designed the UI in Figma and split the work across the frontend team, then built the web and mobile apps.

Angular, React Native, REST APIs, SCSS, Figma

Leadership & process
Technical leadership, Scrum, Figma, Code review, Mentoring, Kanban, UI design

Education

Catholic University of Angola
Bachelor's degree in Computer Engineering, 2023

Languages

Portuguese, native
English, professional

Selected products

Storyroo storyroo-app.vercel.app
Turns a child's name, age and interests into a personalised illustrated book, audiobook and song, ready to print.
Next.js 16, AI SDK, OpenAI, Anthropic, Supabase, QStash, Resend

Traviro
Swipe through very cheap real flight deals, then let an AI agent plan the whole trip around the fare you picked.
Next.js, Amadeus API, OpenAI, Supabase, Upstash, Leaflet

Senvyra Internal tool
Send WhatsApp template campaigns safely: import a CSV, pick a template, test, confirm consent and track every recipient.
Next.js, Drizzle, PostgreSQL, Supabase, WhatsApp Cloud API, Twilio

Fila Livre
Appointment booking and queue management for service businesses, with maps and dashboards. Full stack, built solo.
Next.js, PrimeReact, Spring Boot, Spring Security, MySQL, Spring AI

Auravoy
An AI travel companion whose home screen changes with each stage of the trip: plan, budget with receipt scanning, keep documents and memories.
Next.js 16, React 19, Expo, Supabase, TanStack Query, Tailwind 4

Pageryn
Splits whole books into 3–8 minute episodes with cliffhangers, to read or listen to like a series.
Next.js 15, Claude, OpenAI TTS, Supabase, epub.js, Expo

eFinanceOS In progress
A personal finance copilot that sorts spending, spots money leaks, forecasts cash flow and lets you test a decision before making it.
Turborepo, Next.js 15, AI SDK, pgvector, Inngest, FastAPI, Stripe

ZapVendas
A store builder for selling through WhatsApp, with Pix QR checkout and a sales dashboard.
Next.js, Supabase, React Hook Form, Recharts
