Edson Paulo Gregório

Senior Software Engineer & Tech Lead, web, mobile & AI

edsonpaulo24@gmail.com +244 942 682 194 edsonpaulo.github.io linkedin.com/in/edsonpaulo1
github.com/EdsonPaulo Working remotely with companies and teams around the world.

Senior software engineer and tech lead who designs, builds and scales web and mobile products end to end: from architecture and the first commit to the App Store, with payments, multi-language support and AI built in. Marketplaces used every day across Europe and South America run on my work, and I create my own AI products on top.

Experience

sheerME / Frontend Team Lead & Senior Developer — Dec 2021 – now

I **lead frontend engineering** for a beauty and wellness marketplace used every day across Portugal and Brazil, owning the customer and business apps on iOS, Android and web end to end, from architecture to store release.

- **#1 contributor of all time** on both mobile apps (2,700+ commits), upgraded through to Expo SDK 57 and React 19 without slowing releases.
- **Three production frontends from scratch**: the business app (2022), the PRO back office (2023) and the marketplace website (2025).
- **Payments everywhere**: cards, Apple Pay, Google Pay, Pix, Stripe Connect payouts and Tap to Pay.
- **Multi-language, multi-brand platform**: every app ships in several languages and as white-label brands from a single codebase.
- **Own the frontend architecture and engineering standards**; code review, mentoring and pairing that level up the whole team.

What I build there: Customer app, PRO & Salon app, PRO web, Marketplace website, WhatsApp booking assistant.
React Native, Expo, React, Next.js, TypeScript, Node.js, Stripe

Fisgar BR / Frontend Developer — Jul 2021 – Feb 2023

Built and maintained web apps for a Brazilian product company, working remotely in a Scrum team alongside my other roles.
React, TypeScript, Redux, Scrum

Mochi Noir & Met-Care / Project Manager — May – Aug 2021

Promoted to run delivery across two client products: planned and split the work, led the team rituals and owned code review.

Mochi Noir / Mobile Lead & Frontend Developer — Sep 2020 – May 2021

Built e-commerce platforms and digital stores. **Led mobile development** in React Native with a team of 4+ developers, and shipped web storefronts and landing pages in React.
React Native, React, TypeScript, Redux, Jest

Petabyte / Frontend Lead & UI Designer — Feb – Sep 2020

Led the frontend of a mid-size project: planned it, designed the UI in Figma and split the work across the frontend team, then built the web and mobile apps.
Angular, React Native, REST APIs, SCSS, Figma

Selected products

Storyroo storyroo-app.vercel.app

Turns a child's name, age and interests into a personalised illustrated book, audiobook and song, ready to print.
Next.js 16, AI SDK, OpenAI, Anthropic, Supabase, QStash, Resend

Auravoy auravoy.vercel.app

An AI travel companion whose home screen changes with each stage of the trip: plan, budget with receipt scanning, keep documents and memories.
Next.js 16, React 19, Expo, Supabase, TanStack Query, Tailwind 4

Traviro traviro.vercel.app

Swipe through very cheap real flight deals, then let an AI agent plan the whole trip around the fare you picked.

Next.js, Amadeus API, OpenAI, Supabase, Upstash, Leaflet

Pageryn pageryn.vercel.app

Splits whole books into 3–8 minute episodes with cliffhangers, to read or listen to like a series.

Next.js 15, Claude, OpenAI TTS, Supabase, epub.js, Expo

Senvyra Internal tool

Send WhatsApp template campaigns safely: import a CSV, pick a template, test, confirm consent and track every recipient.

Next.js, Drizzle, PostgreSQL, Supabase, WhatsApp Cloud API, Twilio

eFinanceOS In progress

A personal finance copilot that sorts spending, spots money leaks, forecasts cash flow and lets you test a decision before making it.

Turborepo, Next.js 15, AI SDK, pgvector, Inngest, FastAPI, Stripe

Fila Livre fila-livre.vercel.app

Appointment booking and queue management for service businesses, with maps and dashboards. Full stack, built solo.

Next.js, PrimeReact, Spring Boot, Spring Security, MySQL, Spring AI

ZapVendas zap-vendas-rho.vercel.app

A store builder for selling through WhatsApp, with Pix QR checkout and a sales dashboard.

Next.js, Supabase, React Hook Form, Recharts

Skills

Languages	TypeScript, JavaScript (ES6+), HTML5, CSS3 / Sass, Java, Python, Dart, SQL, C
Frontend	React, Next.js, Angular, Vue.js, Redux & Redux Saga, TanStack Query, Zustand, Context API, React Hook Form, Formik, Zod, Yup, next-intl, i18next
UI & styling	Tailwind CSS, styled-components, Emotion, Material UI, Chakra UI, Ant Design, PrimeReact / PrimeFaces, Bootstrap, Radix UI, Framer Motion, GSAP, Three.js / React Three Fiber
Mobile	React Native, Expo & EAS, Expo Router, React Navigation, Reanimated, Push notifications, App Store & Play Store releases, Flutter, Android
Backend & APIs	Node.js, Express, REST & RESTful APIs, Socket.IO, Prisma, Drizzle, Sequelize, Mongoose, Spring Boot, Spring Security & JPA, Flask, FastAPI, Ruby on Rails, JSP & Servlets, Inngest, Upstash QStash
Databases & storage	PostgreSQL, Supabase, MySQL, MongoDB / NoSQL, Redis, SQLite, pgvector, Firebase, Realm, AWS (EC2, S3), Cloudflare R2
AI	OpenAI, Anthropic Claude, Vercel AI SDK, Spring AI, Replicate, Whisper, Text-to-speech, Embeddings & RAG, AI agents
Payments	Stripe, Stripe Connect, Stripe Terminal (Tap to Pay), Apple Pay, Google Pay, Pix, RevenueCat
Integrations	WhatsApp Cloud API, Twilio, Resend, Web Push, Firebase Cloud Messaging, Mapbox, Google Maps, Leaflet, Amadeus, Chart.js, Recharts, ApexCharts
Quality & monitoring	Unit, integration & e2e testing, Jest, Cypress, Playwright, Selenium, Sentry, Amplitude, Segment, Google Analytics, PostHog
DevOps & tools	Git, GitHub, GitHub Actions, Docker, Linux, Vercel, Turborepo, Monorepos, npm / yarn / pnpm
Design & process	Figma, Adobe XD, Photoshop, UI design, Scrum, Kanban, Code review, Mentoring, Technical leadership, Clean, reusable code

Education

Catholic University of Angola

BSc in Computer Science, 2023
